GULF ISLAND FABRICATION, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

FOR THE THREE-MONTH AND NINE-MONTH
PERIODS ENDED SEPTEMBER 30, 2011 AND 2010

NOTE 1 – ORGANIZATION AND SIGNIFICANT ACCOUNTING PRINCIPLES

Gulf Island Fabrication, Inc. (hereinafter the “Company”, “we” or “our”), serves as a holding company and conducts all of its operations through its subsidiaries, which include Gulf Island, L.L.C. and Gulf Marine Fabricators, L.P. (both performing fabrication of offshore drilling and production platforms and other specialized structures used in the development and production of oil and gas reserves), Gulf Island Marine Fabricators, L.L.C. (performing marine fabrication and construction services), Dolphin Services, L.L.C. (performing offshore and onshore fabrication and construction services), Dolphin Steel Sales, L.L.C. (selling steel plate and other steel products) and Gulf Island Resources, L.L.C. (hiring of laborers with similar rates and terms as those provided by contract labor service companies). Our corporate offices and five of our major subsidiaries are located in Houma, Louisiana, with another major subsidiary located in south Texas. Our principal markets are concentrated in the offshore regions and along the coast of the Gulf of Mexico. The consolidated financial statements include the accounts of Gulf Island Fabrication, Inc. and its wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated in consolidation.

Structures and equipment fabricated by us include jackets and deck sections of fixed production platforms; hull, tendon, and/or deck sections of floating production platforms (such as TLPs, SPARs, FPSOs and MinDOCs); piles; wellhead protectors; subsea templates; various production, processing, compressor and utility modules; offshore living quarters; brown water towboats; barges; lift boats; offshore support vessels and mid-body sections for offshore supply vessels. We also provide services such as offshore interconnect pipe hook-up; inshore marine construction; manufacture and repair of pressure vessels; heavy lifts such as ship integration and TLP module integration; loading and offloading jack-up drilling rigs, semi-submersible drilling rigs, TLPs, SPARs or other similar cargo.; steel warehousing and sales; onshore and offshore scaffolding and piping insulation services. For definitions of certain technical terms contained in this Form 10-Q, see the Glossary of Certain Technical Terms contained in our Annual Report on Form 10-K for the year ended December 31, 2010.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three-month and nine-month periods ended September 30, 2011 are not necessarily indicative of the results that may be expected for the year ended December 31, 2011.

The balance sheet at December 31, 2010 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements.

[Table of Contents](#)

For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2010

NOTE 2 – CONTRACTS RECEIVABLE AND RETAINAGE

On January 14, 2011, we entered into an agreement with one of our customers regarding the collection of an \$11.0 million retainage balance on a completed contract. As consideration to extend payment, we agreed to receive \$12.5 million, payable in twenty equal monthly installments beginning on June 30, 2011. Since the payment period extends further than twelve months, we discounted the final contract price by \$1.4 million, applying a discount rate of 9.5%, based on our credit risk analysis. We began recognizing the discount as interest income over the twenty month term beginning June 30, 2011, which is consistent with the first scheduled payment of the contract retainage under the original contract. As a result of this financing agreement, we reclassified the remaining scheduled payments, net of discount, from contract retainage to current and long-term contracts receivable. This transfer was treated as a non-cash operating activity for purposes of the statement of cash flows. All scheduled payments have been received through October 31, 2011.

NOTE 3 – OTHER RECEIVABLES

As of December 31, 2010, we had previously recorded \$5.9 million, net of advances received from our insurance provider, in "Other receivables" related to an insurance claim for costs incurred in connection with an April 2008 accident at our Texas facility involving four cranes. During 2009, our insurer disputed certain aspects of this claim, and a hearing was ultimately held in January 2011 concerning this matter. On April 8, 2011, we received an unfavorable ruling regarding this claim. As a result, in March 2011 we recognized all recorded amounts as asset impairments of \$7.7 million, of which \$5.9 million related to disputed crane rental costs and \$1.8 million related to the remaining net book value of one of the cranes involved in the accident that is now deemed a total loss. We have filed an appeal and intend to continue to pursue this matter through legal proceedings as we believe we are owed the amounts related to our claim; however, no assurance can be made as to the final outcome of our appeal.

NOTE 4 – LINE OF CREDIT

Effective May 31, 2011, we extended the term of our \$60 million revolving credit facility (the "Revolver") from December 31, 2012 to December 31, 2013. All other terms of our Revolver remain unchanged. Our Revolver is secured by our real estate, machinery and equipment, and fixtures. Amounts borrowed under the Revolver bear interest, at our option, at the prime lending rate established by JPMorgan Chase Bank, N.A. or LIBOR plus 1.5 percent. We pay a fee on a quarterly basis of one-fourth of one percent per annum on the weighted-average unused portion of the Revolver.

At September 30, 2011, no amounts were borrowed under the Revolver, and we had outstanding letters of credit totaling \$11.6 million, which reduced the unused portion of the Revolver to \$48.4 million. We are required to maintain certain financial covenants, including balance sheet and cash flow ratios. As of September 30, 2011, we were in compliance with these covenants.

NOTE 5 – CONTRACT COSTS

We define material, freight, equipment rental and sub-contractor services included in the direct costs of revenue associated with projects as pass-through costs. Since we use the percentage-of-completion accounting method to recognize revenue on construction

[Table of Contents](#)

contracts, by using a direct labor efforts expended method, pass-through costs have little or no impact in the determination of gross margin for a particular period. Pass-through costs included in revenue were 46.9% and 29.2% for the three-month periods ended September 30, 2011 and 2010, respectively. Pass through costs included in revenue were 46.6% and 37.2% for the nine-month periods ended September 30, 2011 and 2010, respectively.

At September 30, 2011, we recorded revenue totaling \$1.7 million related to certain change orders on two projects which have been approved as to scope but not price. We expect to resolve these change orders in the fourth quarter of 2011. At September 30, 2010, we had no unapproved change orders recorded in revenue.

Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined. We recognized contract losses of \$1.8 million and \$498,000 in the three months ended September 30, 2011 and 2010, respectively. We recognized contract losses of \$2.4 million and \$1.3 million in the nine months ended September 30, 2011 and 2010, respectively.

NOTE 6 – EARNINGS (LOSS) PER SHARE

The following table sets forth the computation of basic and diluted earnings (loss) per share (in thousands, except per share data):

NOTE 7 – SUBSEQUENT EVENTS

On October 27, 2011, our Board of Directors declared a dividend of \$0.06 per share on the shares of our common stock outstanding, payable November 29, 2011 to shareholders of record on November 14, 2011.

[Table of Contents](#)

Report of Independent Registered
Public Accounting Firm

The Board of Directors and Shareholders
Gulf Island Fabrication, Inc.

We have reviewed the condensed consolidated balance sheet of Gulf Island Fabrication, Inc. as of September 30, 2011, and the related condensed consolidated statements of operations for the three-month and nine-month periods ended September 30, 2011 and 2010, condensed consolidated statements of cash flows for the nine-month periods ended September 30, 2011 and 2010, and condensed consolidated statement of changes in shareholders' equity for the nine-month period ended September 30, 2011. These financial statements are the responsibility of the Company's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures, and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated interim financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Gulf Island Fabrication, Inc. as of December 31, 2010, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the year then ended (not presented herein) and in our report dated February 28, 2011, we expressed an unqualified opinion on those consolidated financial statements. In our opinion the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2010, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Forward-Looking Statements

Statements under “Backlog,” “Results of Operations” and “Liquidity and Capital Resources” and other statements in this report and the exhibits hereto that are not statements of historical fact are forward-looking statements. These statements are subject to certain risks and uncertainties that could cause actual results and outcomes to differ materially from the results and outcomes predicted in the forward-looking statements and investors are cautioned not to place undue reliance upon such forward-looking statements. Important factors that may cause our actual results to differ materially from expectations or projections include those described in Item 1A. Risk Factors included in our Annual Report on Form 10-K for the year ended December 31, 2010. Such factors include, among others, the cyclical nature of the oil and gas industry; our ability to attract and retain skilled employees at acceptable compensation rates; the timing of new projects, including deepwater projects, and our ability to obtain them; and competitive factors in the marine fabrication and construction industry.

Critical Accounting Policies and Estimates

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles, which require us to make estimates and assumptions (see Note 1 to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2010). We believe that our accounting policy on revenue recognition involves a high degree of judgment and complexity. Critical accounting policies are discussed more fully in our Annual Report on Form 10-K for the year ended December 31, 2010. There have been no changes in our evaluation of our critical accounting policies since that date.

Backlog

Our backlog is based on management’s estimate of the direct labor hours required to complete, and the remaining revenue to be recognized with respect to those projects a customer has authorized us to begin work or purchase materials pursuant to written contracts, letters of intent or other forms of authorization. Often, however, management’s estimates are based on incomplete engineering and design specifications. As engineering and design plans are finalized or changes to existing

Table of Contents

plans are made, management's estimate of the direct labor hours required to complete a project and the price of a project at completion is likely to change. In addition, all projects currently included in our backlog are subject to termination at the option of the customer, although the customer is generally required to pay us for work performed and materials purchased through the date of termination and, in some instances, cancellation fees. In addition, customers have the ability to delay the execution of projects.

As of September 30, 2011, we had revenue backlog of \$664.7 million and a labor backlog of approximately 5.2 million man-hours, consisting of work remaining on commitments received through October 31, 2011, compared to revenue backlog of \$486.1 million and a labor backlog of 3.8 million man-hours as of December 31, 2010.

Of our backlog at October 31, 2011,

- 77.8% is for three customers as compared to 64.1% for one customer at December 31, 2010.
- \$545.4 million, or 82.1%, represented projects destined for deepwater locations compared to \$343.4 million, or 70.6%, at December 31, 2010.
- \$59.7 million, or 9.0%, represented projects destined for foreign locations compared to \$33.8 million, or 7.0%, at the December 31, 2010.

Depending on the size of the project, the termination or postponement of any one of our deepwater projects could significantly reduce our backlog, and could have a material adverse effect on revenue, net income and cash flow.

As of October 31, 2011, we expect to recognize revenues of approximately

- \$99.2 million, or 14.9%, during the remainder of calendar year 2011,
- \$478.3 million during calendar year 2012 and
- \$87.2 million thereafter.

Recognition of revenue of the backlog as presented above is based on management estimates of the application of the direct labor hours of the backlog during the current projected timelines to complete the projects. Certain factors and circumstances, as mentioned above, could cause changes in when the backlog is recognized as revenue thus, the timing of backlog revenue recognition could differ from the periods presented.

Based on the activity of the major oil and gas companies and certain engineering companies, we believe that there could be two or three deepwater projects awarded during the latter part of 2012, with another two or three deepwater projects awarded in mid-2013. Given the current level of deepwater projects, the potential to increase the backlog in the near term continues to be marine related projects, where bidding activity remains steady.

Workforce

As of September 30, 2011, we had approximately 1,700 employees and approximately 125 contract employees, compared to approximately 1,250 employees and approximately 10 contract employees as of December 31, 2010.

Results of Operations

Our revenue for the three-month periods ended September 30, 2011 and September 30, 2010, was \$85.8 million and \$60.7 million, respectively, an increase of 41.3%. Our revenue for the nine-month periods ended September 30, 2011 and

Table of Contents

September 30, 2010, was \$219.4 million and \$205.3 million, respectively, representing an increase of 6.9%.

The following factors contributed to the increase in revenue for the three-month period ended September 30, 2011 compared to the three-month period ending September 30, 2010:

- The amount of man-hours worked was 759,000 during the three-month period ended September 30, 2011, compared to 625,000 for the three-month period ended September 30, 2010. As a result of the increase in our backlog since the fourth quarter of 2010, we began ramping up our labor force, thus increasing man-hours worked. Man-hours worked at our Texas facility increased 57.6% as compared to the three months ended September 30, 2010.
- Pass-through costs, as a percentage of revenue, for the three-month period ended September 30, 2011 were 46.9% compared to 29.2% for the three-month period ended September 30, 2010. The increase in pass-through costs for the three months ended September 30, 2011, primarily relates to certain deepwater projects. Pass-through costs, as described in Note 5 in the Notes to Consolidated Financial Statements, are included in revenue, but have little or no impact to the amount of gross margin.

The increase in revenue for the nine-month period ended September 30, 2011 compared to the nine-month period ended September 30, 2010 is related to the increase in pass-through costs, primarily material. Pass-through costs as a percentage of revenue for the nine-month period ended September 30, 2011 were 46.6%, compared to 37.2% for the nine-month period ended September 30, 2010.

At September 30, 2011, we recorded revenue totaling \$1.7 million related to certain change orders on two projects which have been approved as to scope but not price. We expect to resolve these change orders in the fourth quarter of 2011. At September 30, 2010, we had no unapproved change orders recorded in revenue.

For the three-month periods ended September 30, 2011 and September 30, 2010, gross profit was \$4.0 million (4.7% of revenue) and \$6.9 million (11.4% of revenue), respectively. Factors that contributed to the decrease in gross margin for the three-month period ended September 30, 2011 compared to the three-month period ended September 30, 2010 include:

- Pass-through costs, as a percentage of revenue, as discussed above.
- Although man-hours increased by 21.5% for the quarter ended September 30, 2011 compared to September 30, 2010, man-hours currently estimated to complete two projects exceeded the number of estimated man-hours included in the original contract price on these projects by approximately 91,000 hours. The excess man-hours worked on these two projects

Table of Contents

represented approximately 12.0% of total man-hours for the quarter. No adjustment has been made to the original contract prices for these hours. We are in discussions with these customers, to increase the final contract price to recover some of these costs but there is no assurance that we will realize these changes.

- We recognized contract losses of \$1.8 million in the three months ended September 30, 2011 with respect to one of the projects mentioned above.
- Our marine yard experienced one week of down time due to Tropical Storm Lee that struck our facilities in Louisiana.

For the nine-month period ended September 30, 2011, gross loss was \$718,000 compared to gross profit of \$21.1 million (10.3% of revenue) for the nine-month period ended September 30, 2010. Factors contributing to the decrease in gross profit for the nine-month period ended September 30, 2011 compared to the nine-month period ended September 30, 2010 include:

- On April 8, 2011, the Company received an unfavorable ruling on an insurance claim for costs incurred in connection with an April 2008 crane accident, resulting in the Company having to recognize a charge of \$7.7 million related to impairments of a receivable and to the remaining book value of one of the cranes involved in the accident. For additional information, see Note 3 in the Notes to Consolidated Financial Statements.
- Pass-through costs as a percentage of revenue as discussed above.
- Man-hours worked decreased by 3.9%, primarily as a result of the temporary reduction in work volume at our Texas facility. Although we were awarded two large deepwater projects to be fabricated at our Texas facility in late 2010 and early 2011, the low level of production hours at this facility did not allow us to cover certain fixed costs. We continue to ramp up our production at our Texas facility for these deepwater contracts through the remainder of 2011, but we do not anticipate to see a significant ramp-up until sometime in the first quarter of 2012. We expect these contracts to significantly contribute to revenue over the next two years.
- We recognized \$2.4 million of contract losses on uncompleted contracts on one project during the nine-months ended September 30, 2011, as compared to \$1.3 million for the nine-months ended September 30, 2010.

The Company's general and administrative expenses were \$1.9 million and \$5.8 million for the three-month and nine-month periods ended September 30, 2011, respectively. This compares to \$2.0 million and \$6.1 million for the three-month and nine-month periods ended September 30, 2010, respectively. As a percentage of revenue, general and administrative expenses for the three-month and nine-month periods ended September 30, 2011 were 2.2% and 2.6%, respectively, compared to 3.3% and 3.0% for the three-month and nine-month periods ended September 30, 2010, respectively.

Table of Contents

The Company had net interest income of \$330,000 and \$447,000 for the three-month and nine-month periods ended September 30, 2011, compared to net interest income of \$1.0 million and \$2.3 million for the three-month and nine-month periods ended September 30, 2010, respectively. The interest income for the periods ended September 30, 2011 was primarily related to the accretion of the discount associated with the financing arrangement described in Note 2 in the Notes to Consolidated Financial Statements. The interest income for the periods ended September 30, 2010 was primarily related to the accretion of the discount associated with the financing arrangement with Bluewater and ATP on the fabrication of the MinDOC I hull. On November 29, 2010, our financing arrangement with Bluewater/ATP was completely settled following the sale of our limited overriding royalty interest.

The Company had other income of \$89,000 and \$317,000 for the three-month and nine-month periods ended September 30, 2011, respectively, compared to \$23,000 and \$1.1 million for the three-month and nine-month periods ended September 30, 2010, respectively. Other income for the periods ended September 30, 2011 represents gains on sales of miscellaneous equipment. Other income for nine-month period ended September 30, 2010 represents the settlement of claims related to damages incurred in connection with the hurricanes that hit the Gulf Coast in 2008.

Our effective income tax rate for the three-month and nine-month periods ended September 30, 2011 was 38.0%, compared to effective tax rates of 42.2% and 38.0% for the comparable periods of 2010. The decrease in the effective rate for the three-month period in 2011 was related to the increase in activity at our Texas facility compared to the reduction in activity at that facility in the third quarter of 2010. This reduction in activity caused a decrease in our estimated Federal qualified production activities income deduction and an increase in Louisiana state income tax apportionment in 2010.

Liquidity and Capital Resources

Historically, we have funded our business activities through funds generated from operations. Effective May 31, 2011, we extended the term of our \$60 million revolving credit facility (the "Revolver") from December 31, 2012 to December 31, 2013. All other terms of our Revolver remained unchanged. Our Revolver is secured by our real estate, machinery and equipment, and fixtures. Amounts borrowed under the Revolver bear interest, at our option, at the prime lending rate established by JPMorgan Chase Bank, N.A. or LIBOR plus 1.5 percent. We pay a fee on a quarterly basis of one-fourth of one percent per annum on the weighted-average unused portion of the Revolver.

At September 30, 2011, no amounts were borrowed under the Revolver, and we had outstanding letters of credit totaling \$11.6 million, which reduced the unused portion of the Revolver to \$48.4 million. We are required to maintain certain financial covenants, including balance sheet and cash flow ratios, and as of September 30, 2011, were in compliance with these covenants.

At September 30, 2011, our cash and cash equivalents totaled \$61.2 million. For the nine-months ended September 30, 2011, net cash provided by operating activities

Table of Contents

was \$9.0 million and capital expenditures for the period were \$33.4 million. Working capital was \$96.0 million and ratio of current assets to current liabilities was 2.55 to 1 at September 30, 2011. The \$7.7 million charge for asset impairments related to the insurance claim as described in Note 3 in the Notes to Consolidated Financial Statements had no effect on our cash or working capital for the period.

The overall decrease in cash provided by operations for the period ended September 30, 2011, compared to the period ended September 30, 2010, is mainly due to the increase in contract related assets partially offset by the increase in contract related liabilities. As we began working on the larger deepwater projects we have in our backlog, our contract related liabilities, including accounts payable, increased \$44.9 million as we purchased a larger volume of materials for those projects, and contract related assets, including accounts receivable, increased \$63.9 million as we invoiced customers for the purchase of such materials. Also contributing to the decrease in cash provided by operations was our \$15.0 million decrease in net income for the nine months ended September 30, 2011, compared to the nine months ended September 30, 2010 as discussed above.

Net cash used in investing activities for the nine months ended September 30, 2011, was \$33.4 million, all of which related to capital expenditures for equipment and improvements to our production facilities. Included in capital expenditures for the nine months ended September 30, 2011 were certain equipment and improvements to our Texas facility, including \$11.0 million for two Manitowoc crawler cranes; \$3.3 million representing the cost of constructing a gate for the graving dock at our Texas yard; \$1.0 million on a project in progress to extend the length of our graving dock; and \$1.8 million on the purchase of equipment and the installation of a panel line system also in progress. Also included in capital expenditures for the first nine months of 2011 was \$3.3 million for six Kamag transporters delivered in the third quarter of 2011 for our Louisiana facilities. In addition, we purchased, for \$2.3 million, an additional 29 acres adjacent to our Dolphin Services facilities to expand this subsidiary's capabilities. The acquisition included fabrication, warehouse and office space totaling 41,400 square feet. We have approximately \$6.6 million budgeted for additional capital expenditures through the remainder of the year.

Net cash used in financing activities for the nine months ended September 30, 2011 was \$2.5 million, primarily relating to cash used to pay dividends on shares of our common stock.

While current job awards will, and future job awards may, require us to issue additional letters of credit further reducing the capacity available on our Revolver, we believe our cash generated by operating activities and funds available under the Revolver will be sufficient to fund our capital expenditures and meet our working capital needs. Based on our current projections, our outstanding letters of credit could increase to \$22.0 million by the end of 2011.

We may expand our operations through acquisitions in the future, which may require additional equity or debt financing which we believe would be available to us.

Contractual Obligations

There have been no material changes from the information included in our Annual Report on Form 10-K for the year ended December 31, 2010.

[Table of Contents](#)

Off-Balance Sheet Arrangements

There have been no material changes from the information included in our Annual Report on Form 10-K for the year ended December 31, 2010.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

There have been no material changes in the Company's market risks during the quarter ended September 30, 2011. For more information on market risk, refer to Part II, Item 7A of our Annual Report on Form 10-K for the year ended December 31, 2010.

Item 4. Controls and Procedures.

The Company's management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that the design and operation of our disclosure controls and procedures were effective as of such date to provide assurance that information required to be disclosed by the Company in the reports that it files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and that such information is accumulated and communicated to management as appropriate to allow timely decisions regarding disclosure.

There have been no changes during the fiscal quarter ended September 30, 2011 in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

The Company is subject to various routine legal proceedings in the normal conduct of its business primarily involving commercial claims, workers' compensation claims, and claims for personal injury under general maritime laws of the United States and the Jones Act. While the outcome of these lawsuits, legal proceedings and claims cannot be predicted with certainty, management believes that the outcome of any such proceedings, even if determined adversely, would not have a material adverse effect on the financial position, results of operations or cash flows of the Company.

Item 1A. Risk Factors.

There have been no material changes from the information included in the Company's Annual Report on Form 10-K for the year ended December 31, 2010.

Item 6. Exhibits.

- 3.1 Composite Articles of Incorporation of the Company, incorporated by reference to Exhibit 3.1 of the Company's Form 10-Q filed April 23, 2009.
- 3.2 Bylaws of the Company, as amended and restated through July 28, 2011, incorporated by reference to Exhibit 3.1 of the Company's Form 8-K filed on August 1, 2011.
- 4.1 Specimen Common Stock Certificate, incorporated by reference to the Company's Form S-1 filed February 14, 1997 (Registration No. 333-21863).
- 10.1 The Company's 2011 Stock Incentive Plan incorporated by reference to Exhibit 99.1 to the Company's Form S-8 filed on August 9, 2011.
- 15.1 Letter regarding unaudited interim financial information.
- 31.1 CEO Certifications pursuant to Rule 13a-14 under the Securities Exchange Act of 1934.
- 31.2 CFO Certifications pursuant to Rule 13a-14 under the Securities Exchange Act of 1934.
- 32 Section 906 Certification furnished pursuant to 18 U.S.C. Section 1350.
- 99.1 Press release issued by the Company on October 13, 2011, announcing the scheduled time for the release of its 2011 third quarter earnings and its quarterly conference call.

**FOR IMMEDIATE RELEASE
OCTOBER 13, 2011**

**GULF ISLAND FABRICATION, INC.
TO ANNOUNCE EARNINGS RESULTS
AND QUARTERLY CONFERENCE CALL**

Houma, LA — (BUSINESS WIRE) — October 13, 2011 — Gulf Island Fabrication, Inc. (NASDAQ: GIFL), will announce 2011 third quarter earnings after the market close on Thursday, October 27, 2011.

The management of Gulf Island Fabrication, Inc. will hold a conference call on Friday, October 28, 2011, at 9:00 a.m. Central Time (10:00 a.m. Eastern Time) to discuss the Company's financial results for the quarter ended September 30, 2011.

The call is accessible by webcast through CCBN and by dialing the following:

Dial In: 1.888.811.5445
Webcast: www.gulfisland.com

A digital rebroadcast of the call is available two hours after the call and ending November 4, 2011 by dialing:

Phone Number: 1.888.203.1112
Replay Passcode: 4512779

Gulf Island Fabrication, Inc., based in Houma, Louisiana, is a leading fabricator of offshore drilling and production platforms, hull and/or deck sections of floating production platforms and other specialized structures used in the development and production of offshore oil and gas reserves. These structures include jackets and deck sections of fixed production platforms; hull and/or deck sections of floating production platforms (such as tension leg platforms ("TLPs")), "SPARs, FPSOs", piles, wellhead protectors, subsea templates and various production, compressor and utility modules, offshore living quarters, tanks and barges. The Company also provides offshore interconnect pipe hook-up, inshore marine construction, manufacture and repair of pressure vessels, heavy lifts such as ship integration and TLP module integration, loading and offloading of jack-up drilling rigs, semi-submersible drilling rigs, TLPs, SPARs, or other similar cargo, onshore and offshore scaffolding, piping insulation services, and steel warehousing and sales.
